

# Hilliers Garden Visit

Year Three visited Hilliers Gardens near Romsey as part of our science topic. We had an amazing day walking around the garden and learning new things. We started the day with drama, pretending to be seeds turning into flowers and then being pollinated by Beatrice Bee. We then played seed survival where we learned that there are lots of things that can kill seeds.

We walked around the gardens and found lots of interesting things.

I hid inside an igloo shaped tree!

The light meters were fun to use. We worked out the best places to plant new trees.

I really enjoyed crossing the bridge. It was bouncy and people jumped on it.

My favourite part was going through the Gunnera tunnel.

The whole class managed to fit around the base of this Giant Red Wood and it was only a baby.
