

Shelters

This week we have been marooned on a desert island! Our challenge was to make a shelter that is waterproof, windproof and strong. First we explored lots of different materials. Then we built our shelters. We had to work as a team. It was difficult to make the shelters stand up but we persevered!

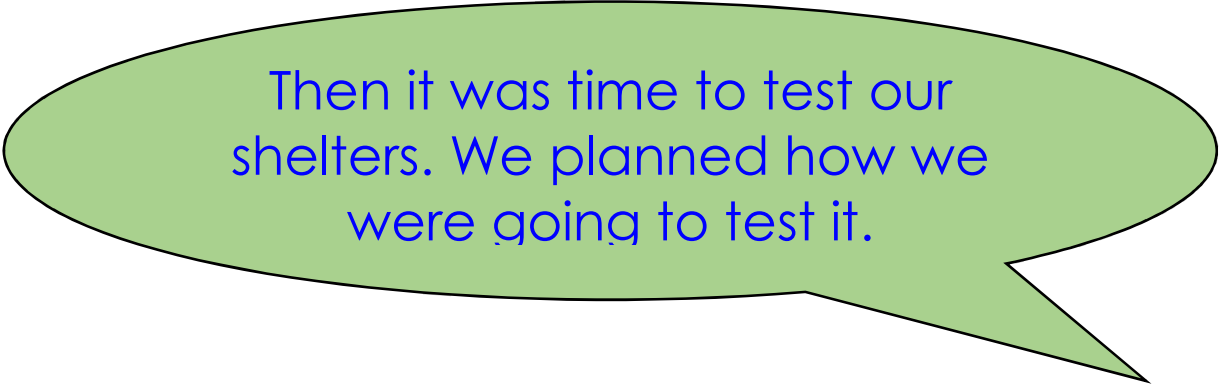

We talked about how to make it fair.
This is how we tested if the shelter was waterproof.

The leaf shelter was not waterproof because it had holes in it. Poor Robbie the Rabbit got wet!!!

Then it was time to test our shelters. We planned how we were going to test it.
