

DRAGONFLIES - GROUND WEEK

During grounds week, Dragonfly class focused on what they expected to see around and in the pond as well as the whole woods. There was a particular focus on what living things we would find. We talked about plants and animals that we would expect to find, then we went to explore and compare what we expected to find to what we actually found.

We also received a letter in class from the council saying that they wanted to turn our woods into a car park. We went back out to the woods to come up with a list of what would be destroyed if the woods were turned into a car park and we wrote a letter back explaining why this could not happen.
