

Foxes Grounds Week 2019

Foxes Grounds week this term started off by looking at Life Cycles. Following the work Foxes had been doing on Puberty the week before. Foxes first started by looking at the lifecycle of a human. They then compared this to the life cycle of an animal.

More specifically they looked at the life cycle of a sea turtle. Next they looked at the life cycles of plants. To do this we went into the woods and picked some flowers which we then cut open to identify the male and female parts of the flower. This gave us a good basis to then understand the process of pollination and fertilisation.

After spending a lot of the week looking at lifecycles we decided to use our woods and our out door learning environments in a different way. We did this by studying the ART of pointillism and used our school grounds as a place to sketch and use our new skill. The area we focused the most on was the pond.
