

Pumpkin Soup

When the children were in year 1 they planted pumpkin seeds. As they grew the children kept watering the plants and in year 2 brought them with and re potted them in bigger pots. They fed them regularly and were rewarded with one large pumpkin. The children had a vote on what to do with their prized pumpkin, the children all decided to make pumpkin soup as one of their class secrets of success is to try new things. The children had to follow written instructions to prepare and cook the soup.
