

Autumn Grounds Week in Newts 2018

During Grounds Week we had a visitor come into our class to tell us all about amphibians. We learnt so much about frogs and newts!

We asked a lot of questions and tried to say and learn many new long words!

During the week we went out many times to find autumn leaves. We used these to sketch and learnt how to do a leaf rubbing using autumn coloured crayons. We also used the leaves to create an autumn tree collage. There were many different types of leaves in our school grounds. We used a leaf identification sheet to help us know which tree they had come from in our Grounds Week Rocket Rota.

We also learn to identify the different parts of a tree and began to learn what the different parts are for.
